Purchasing a device through JB Hi-Fi's Education BYOD Portal is highly recommended, as it ensures your device is compatible with our school's network and software requirements. If you choose to purchase a device from another provider, we will provide limited support.

**To protect our network and ensure compatibility, only pre-approved devices meeting school standards will be connected to the Eltham High School Wi-Fi and receive software deployment services (Intune).**

For those without a supported device, computers are available from the library.
